KEY ELEMENTS

- 76mm galvanised steel tube arches form the main frame.
- Purlins and cross-bracing reinforce the frame structure.
- Bolt-together base rail tubes connect together to form a solid structural foundation.
- C-clamps securely fasten the base rails to the shipping container - without welding.
- Base plates fitted to the base rails, lock the rail assembly to each corner of the containers.
- Cross-container restraint rails prevent anti-uplift lateral movement of the base rails.

QUICKLOCK KIT – EVERYTHING YOU NEED

ARCHES

High-strength galvanised steel arch tubes.

PURLINS

Galvanised purlins for additional structural strength.

BASE RAILS

Connects the structure to the shipping container.

BASE PLATES

Lock-tight corner base plates provide a solid anchor point.

C-CLAMPS

Secure the base rails to the container side top rail.

BOLTS & FIXINGS

Everything included – bolts, nuts and fasteners.

PVC ROOF COVER

610GSM commercial-grade PVC fabric.

MANUALS

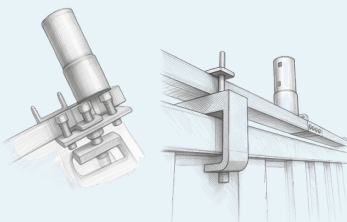

Step-by-step assembly manual and installation guides.

- ✓ Everything supplied.
- ✓ No welding design. 100% bolt-together system.
- ✓ No special tools needed.
- ✓ Assembly manuals included. Clear instructions for rapid assembly.
- ✓ Built to last. 10-year Warranty on the structure and cover.
- ✓ All components pack down efficiently. Easy to transport.

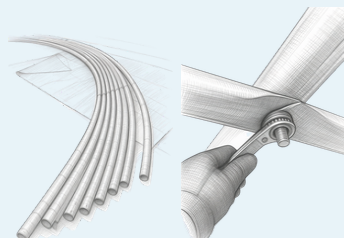

EASY ASSEMBLY – 4 SIMPLE STEPS

1 POSITION BASE RAILS

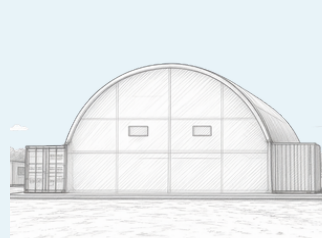

Twist and lock the base rail corner plates into the container corner blocks. Assemble the base rails, secure to the container top rail using custom engineered mechanical C-clamps.

2 BUILD THE FRAME

Connect the arch sections together to create a completed arch. Insert the arches into the truss tube sleeves on the base rails. Purlins connect the arches together.

3 ADD THE END WALL

Assemble the End Wall, and attach the cover securely to the frame and end arch. Tighten the outer cover weatherproofing flap until it is taut.

4 INSTALL THE COVER

Pull the PVC roof cover over the completed frame and secure it using ropes, straps and ratchets. Apply even tension to achieve a snug, weatherproof fit.
